Global Information Technology Report 2014 - The World

Event-driven architecture (EDA), is a software architecture pattern promoting the production, detection, consumption of, and reaction to events.. An event can be defined as "a significant change in state". For example, when a consumer purchases a car, the car's state changes from "for sale" to "sold". A car dealer's system architecture may treat this state change as an event whose occurrence ...

Now readers can develop the solid conceptual, technical and managerial foundations needed for effective systems analysis design and implementation as well as the project management skills for systems development with SYSTEMS ANALYSIS AND DESIGN IN A CHANGING WORLD, 6E.

Systems Analysis and Design in a Changing World, 6th

Microfinance initially had a limited definition - the provision of microloans to poor entrepreneurs and small businesses lacking access to bank and related services. The two main mechanisms for the delivery of financial services to such clients were: (1) relationship-based banking for individual entrepreneurs and small businesses; and (2) group-based models, where several entrepreneurs come ...
