light. The description of atomic phenomena requires quantum mechanics, and the description of phenomena at very high velocities requires Einstein's Theory of Relativity. Both quantum mechanics and relativity were invented in the twentieth century; the laws of classical mechanics were stated by Sir Isaac Newton in 1687[New02].

To make information more reliable and permanent. I know we could charge money, but then we couldn't achieve our mission: a free library for the whole internet. The Internet Archive is a bargain, but we need your help. If you find our site useful, please chip in. Thank you. Brewster Kahle, Founder, Internet Archive
