Introduction. Atlantis is the subject of a legend about an advanced island civilization that was destroyed or lost. Stories about Atlantis are first mentioned in Plato's dialogues Timaeus and Critias, in which characters say it was destroyed by an earthquake or a tsunami about 9,000 years before the time in which Plato wrote.

Some of the major unsolved problems in physics are theoretical, meaning that existing theories seem incapable of explaining a certain observed phenomenon or experimental result. The others are experimental, meaning that there is a difficulty in creating an experiment to test a proposed theory or investigate a phenomenon in greater detail.. There are still some deficiencies in the Standard ...

Abiogenesis, or informally the origin of life, is the natural process by which life arises from non-living matter, such as simple organic compounds. The transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular self-replication, self-assembly, autocatalysis and cell membranes.

That kind of skeptical, questioning, "don't accept what authority tells you" attitude of science "€" is also nearly identical to the attitude of mind necessary for a functioning democracy. Science and democracy have very consonant values and approaches, and I don't think you can have one without the other.
