The Sterile Cockpit Rule is a Federal Aviation Administration (FAA) regulation requiring aircraft pilots to refrain from non-essential activities in the cockpit during critical phases of flight, normally below 10,000 feet (3,050 m). The FAA imposed the rule in 1981, after reviewing a series of accidents that were caused by flight crews who were distracted from their flying duties by engaging ...

A flight recorder is an electronic recording device placed in an aircraft for the purpose of facilitating the investigation of aviation accidents and incidents. Flight recorders are also known by the misnomer black box – they are in fact bright orange to aid in their recovery after accidents.. There are two different flight recorder devices: the flight data recorder (FDR) preserves the recent ...
