(PDF) Functional reconstruction in III C open fracture of

Functional reconstruction of such a vital and dynamic structure is difficult to achieve. The resulting reconstruction and the most appropriate reconstructive choice depends on the size of the tongue resection. As more tongue is resected, normal function ... Functional Reconstruction of the Oral Cavity ...

Functional Reconstruction of the Oral Cavity - Springer

For reconstruction, the ipsilateral pedicled LD muscle was transferred on its neurovascular pedicle for use as a functional substitute. Humeral insertion of the LD was kept in three patients and reattachment to the deltoid tuberosity in one patient.

Functional reconstruction of the deltoid muscle following

Keywords: biological reconstruction, pedicle frozen autograft, juxta-articular malignant tumor, knee extension mechanism, functional reconstruction Introduction Biological reconstruction of the knee extensor mechanism following a wide resection for a juxta-articular musculoskeletal malignancy is a challenging procedure (1).

Functional reconstruction of the knee extension mechanism

A retrospective study was conducted to evaluate the advantages of anterolateral thigh (ALT) flap in tongue reconstruction. Method From September 2008 to February 2012, patients receiving ALT flap tongue reconstruction were included in the study.

Functional tongue reconstruction with the anterolateral

This text, Functional and Aesthetic Reconstruction of Burned Patients, systematically dissects problems associated with burns of the head and neck, burns of the torso, perineum and upper extremity and burns of the lower extremities and feet.

Functional and Aesthetic Reconstruction of Burned Patients

secondary. That successful functional reconstruction is possible without detriment to the upper renal tracts implies that it is sometimes secondary. In other cases reconstruction of the bladder neck is followed by persistent dilatation of the upper tracts, in which event primary detrusor low compliance would seem likely.

Functional Reconstruction of the Exstrophied Bladder

NASAL RECONSTRUCTION Reconstruction is about choices. Any wound will heal by secondary intention or can be closed with a skin graft or a local or regional flap. However, if the goal is the restoration of normal, principles of regional unit repair are applied.^{2,3} 1. Assume patients wish to appear normal. Rarely will unassociated medical ...
