Family medicine (FM), formerly family practice (FP), is a medical specialty devoted to comprehensive health care for people of all ages; the specialist is named a family physician or family doctor. In Europe the discipline is often referred to as general practice and a practitioner as a general practice doctor or GP; this name emphasises the holistic nature of this speciality, as well as its ...

Family medicine - Wikipedia

An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.

The acceptance and commitment therapy model (ACT) is a psychological therapy that teaches mindfulness (â€œpaying attention in a particular way: on purpose, in the present moment, nonjudgementallyâ€™™) 1 and acceptance (openness, willingness to sustain contact) skills for responding to uncontrollable experiences and thereby increased enactment of personal values.

Acceptance and commitment therapy - Pathways for general

Currently skill mix in primary care includes a number of different non-physician health professionals summarized in Table 1a, Table 1b. While there appears to be general agreement that transformation to multidisciplinary teams is necessary, the approaches to implementing primary care teams are highly varied (Bodenheimer and Laing, 2007, Nelson et al., 2010, Smith et al., 2010).

Skill mix, roles and remuneration in the primary care

The Professional Learning process. We have developed this visual and key questions to help you consider your professional learning process. The 'planning wheel' reflects the enquiry process and can be used alongside the model of professional learning to help you focus on the most appropriate and meaningful approach to your learning.
