Also find its zeroes. Solution : A quadratic polynomial, the sum ...

POLYNOMIALS
In this section we look at factoring polynomials a topic that will appear in pretty much every chapter in this course and so is vital that you understand it. We will discuss factoring out the greatest common factor, factoring by grouping, factoring quadratics and factoring polynomials with degree greater than 2.

Algebra - Factoring Polynomials
In mathematics and computer algebra, factorization of polynomials or polynomial factorization is the process of expressing a polynomial with coefficients in a given field or in the integers as the product of irreducible factors with coefficients in the same domain. Polynomial factorization is one of the fundamental tools of the computer algebra systems.. The history of polynomial factorization ...

Factorization of polynomials - Wikipedia
A polynomial equation, also called algebraic equation, is an equation of the form + â^' â^' + â‹¯ + + + = For example, + â^' = is a polynomial equation. When considering equations, the indeterminates (variables) of polynomials are also called unknowns, and the solutions are the possible values of the unknowns for which the equality is true (in general more than one solution may exist).
