**CLIMATE CHANGE: IMPACTS, VULNERABILITIES AND ADAPTATION IN**

The effects of global warming are the environmental and social changes caused (directly or indirectly) by human emissions of greenhouse gases. There is a scientific consensus that climate change is occurring, and that human activities are the primary driver. Many impacts of climate change have already been observed, including glacier retreat, changes in the timing of seasonal events (e.g ...

This article is about the physical impacts of climate change. For some of these physical impacts, their effect on social and economic systems are also described. This article refers to reports produced by the IPCC. In their usage, "climate change" refers to a change in the state of the climate that can be identified by changes in the mean and/or variability of its properties, and that persists ...
